

# California OES Weather Threat Briefing

Sunday, November 28, 2021  
9:00 AM PST

**Day 1 (Sunday):** Locally breezy conditions will combine with ongoing very dry weather to bring another day of elevated fire weather conditions across southern California. Locally dense fog is also expected across the Central Valley and northwest California through late morning, redeveloping again overnight.

Regional Operations Center  
Salt Lake City, UT*

# **WEATHER KEY POINTS**

**11/28/21 - 12/04/21**

## **Sunday-Saturday**

- Fire weather conditions will remain locally elevated across southern California through the evening hours today as gusty winds combine with very low humidity levels and dry vegetation. Any new fires could spread quickly with these conditions.
- Additional periods of elevated fire weather conditions are expected across southern California through late week, especially for areas away from the coast where locally breezy conditions will develop each day while very dry conditions persist
- Patchy overnight and morning dense fog will continue across the Central Valley and deeper valleys of northwestern California through early in the week. Some areas of dense fog could also develop near the coast across southern California at times through midweek..
- Otherwise, mainly dry and mild weather is expected through early next weekend, with some near-record high temperatures possible through midweek

# CALIFORNIA WEATHER IMPACTS

11/28/21 - 12/04/21

<u>Hazards / Day</u>	SUN	MON	TUE	WED	THU	FRI	SAT
<b>Non-Thunderstorm Damaging Winds</b>
